Spot mode :
Applied to clean small areas
less than 10 square meters .

Auto mode :
Applied to clean large areas .
(90 square meters maximum)

Remote control mode :
Directed by remote control to clean specified area .

Function

The cleaner automatically cleans once you turn it on.

The computer determines the best route to clean.

The cleaner can automatically seek the charging base for charging before battery runs out.

After charging, the cleaner will leave the charge base to start cleaning again.

The cleaning time can be set at the charging base plate.

UV light sterilization can kill most bacteria and viruses on the floor.

The IR detector ensures the unit will avoid hitting furniture.

The stair avoidance Detector assures the unit won't drop from stairs.

Self-saving mode is activated should the wheel be entwined in cord wires.

The smart body (just 105mm) can go under the bed and furnitures.

Virtual Wall Detector makes sure the cleaner works in the confined area you want to clean.

Sterilization

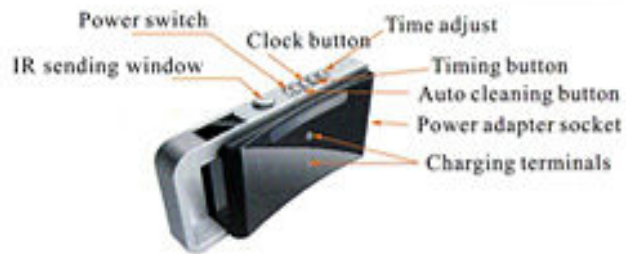

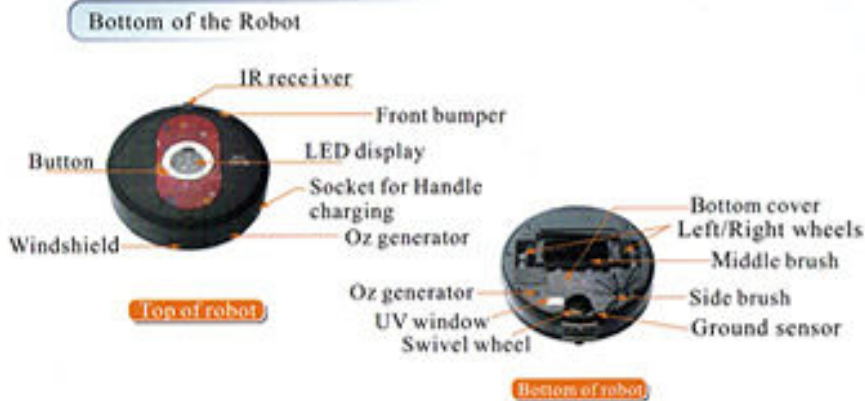

Improved screwy brush provide lower nozzle for better cleaning performance.

The innovative side brush combines six branches to effectively clean the side of a wall.

Soft rubber wheels protect the floor and reduce noise.

Main Specification

Material	ABS	Voltage/Power	14.4V/26W
Remote	7M	Environment	Indoors
Noise	<60dB	Type of Battery	Ni-MH
Charging time	2.5hours	Working time	60 minutes
Coten of Battery	1800mAh	Life-span	3-5years
Net weight	350mm	Height	105mm
Capacity of dustbin	4.5kg	Gross weight	5.5kg
Carton	0.6L	Package	553*167*430
Noise	680*565*465	PCS	4
